

CHAIR_i improves: 12.8 $\rightarrow$ 7.2
a published method, scored the standard way

```
graph TD; A["CHAIRi improves: 12.8 → 7.2  
a published method, scored the standard way"] --> B["H falls: 0.78 → 0.71  
it names fewer objects that  
ARE in the image  
(seven points of recall)"]; A --> C["F falls: 0.010 → 0.005  
it names fewer objects that  
are NOT in the image  
(the half CHAIR rewards)"];
```

***H* falls: 0.78 $\rightarrow$ 0.71**
it names fewer objects that
ARE in the image
(seven points of recall)

***F* falls: 0.010 $\rightarrow$ 0.005**
it names fewer objects that
are NOT in the image
(the half CHAIR rewards)
